

Milling underlays for professionals Adhesive – glueing - classic

Increase efficiency
by fixing small parts optimally.

Adhesive effect – Sealgrip

Anti-slip with a good grip
Securely hold and fix
1- 3 mm thickness
1 m – 1,5 m roll width

- Available in different thicknesses for light and heavy materials
- Delivery in rolls
- Good air permeability
- Fixation by adhesive effect and suction

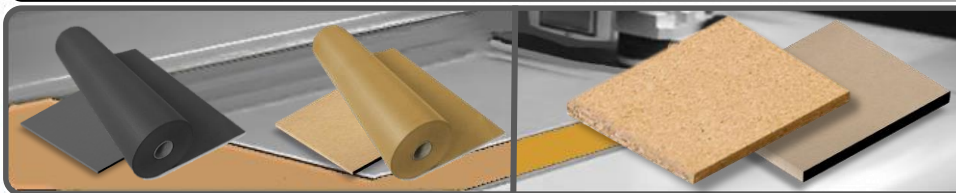

Sticking effect – vilmill™

Fix small parts securely
Special adhesive layers
„tensioning mechanism“
up to 2 m roll width

- vilmill™ - blue** special adhesive layer for optimised fixation
- vilmill™ - black** extra strong adhesive layer for small parts
- the heat at the milling edge leads to the embedding of small parts by melting
- a solid base is required
- Pay attention to the depth of cut, the adhesive sheet must remain intact

Classic

- Fixation by suction
- Various hardness levels
- Customised formats and rolls up to 1.5 m width
- Chipboards, MDF chipboards
- Solid material structure for neat contours
