Optimization for basic blade version

Aristo 7264 / Esko 42423848 / Zünd Typ 6

new raw material - new cutting edge designs - new geometries -
increased usage time - better cutting performance - improved
cut

Made in Germany

Made from TC material

- Longer usage time
- Different cutting edge and wedge angles
- Faceted cutting edge for more stable cutting tip

Always the best solution for:

Canvas, Folding Carton, Magnetic foil, Paper, Polycarbonate, Polyester fabric

Cut well with LESYK!

Optimization for basic blade version

Aristo 7264 / Esko 42423848 / Zünd Typ 6

new raw material - new cutting edge designs - new geometries -
increased usage time - better cutting performance - improved
cut

Made in Germany

Made from TC material

- Longer usage time
- Rounded blade shape generates more downward pressure in a pulling cutting
- Less pushing force
- Reduced fraying and tearing of multi-layer materials

Always the best solution for:

beer coaster cardboard, beer mat cardboard, gasket, gasket material, display carton, thinner flexible materials, DuPont™ Tyvek®, folding carton, flexo clichés and plates (Cyrel®), foam board, Highly abrasive materials, paper for inkjet print, solid carton, paper for high-gloss print, high-gloss foil, strip-plate/ coating plate / varnish plate, canvas, magnetic foil, material with high recycle content, micro corrugated board, paper, foamboard w/ paper surface, cardboard, PC (Lexan®), polyester fabrics, sandblasting-foil, tough paper-based materials

Cut well with LESYK!
