

Milling underlays for professionals

Anti-slip – glueing - classic

Increase efficiency by fixing small parts optimally.

Anti-Slip effect – Sealgrip

Anti-slip with a good grip

Securely hold and fix

1- 3 mm thickness

1 m - 1,5 m - 1,53 m - 1,6 m roll width

The foamed mat made of polyurethane (PUR) is an ideal base for a wide range of milling and cutting plotters. Due to its high porosity, slip and abrasion resistance, it has proven itself in countless applications.

Lesyk does offer Sealgrip as rolls in several widths and lengths.

now up to a roll width of 1.60 m

Sticking effect – *vilmill*TM

Fix small parts securely
Special adhesive layers
„tensioning mechanism“
up to 2 m roll width

thanks to its optimized adhesive layer, *vilmill*TM guarantees the reliable fixing of filigree parts

the heat generated during the processing at the milling edge leads to their embedding by melting the surface of *vilmill*TM.

the result is a tight fit between the milling part and the underlay which allows a reliable force transmission the detachment is possible without residue

*vilmill*TM as *vacuum diffuser*

In addition to heat adhesion, the air-permeable textile assists in consistent dispersion of the vacuum on the contact surface of the milling part. This is particularly effective with filigree contours.

*vilmill*TM for cutting semi-finished products with higher thickness.

*vilmill*TM- black

- with a **strong adhesive coating**, which ensures a particularly safe embedding of small parts during the milling process. Under certain circumstances, the coating residues can remain on the milled edge

*vilmill*TM- Blue

- is equipped with a **lighter adhesive coating**, whereby residues of the milling edge can be avoided.

Underlay - classic

- Fixation by machine vacuum
- Various hardness levels
- Customised formats and rolls up to 1.5 m width
- Solid material structure for neat contours

Do not hesitate to contact us to benefit from our competence based on a long experience

Available for various milling and cutting plotters
