

new generation of milling tools  
**multi-purpose** single-tooth bits with  
**premium-coating**  
for use in medium-hard materials

- polished flute
- highest quality towards carbide grain level
- extra-hard surface character
- extra long-term wear resistance
- low coefficient of friction
- Suitable for:
- **Aluminium, ACM, Plastics, Wood, MDF, FoamedPVC, (Forex<sup>®</sup>, Sintra<sup>®</sup>)**

# multi-purpose single-tooth bits

511061BxxD650x

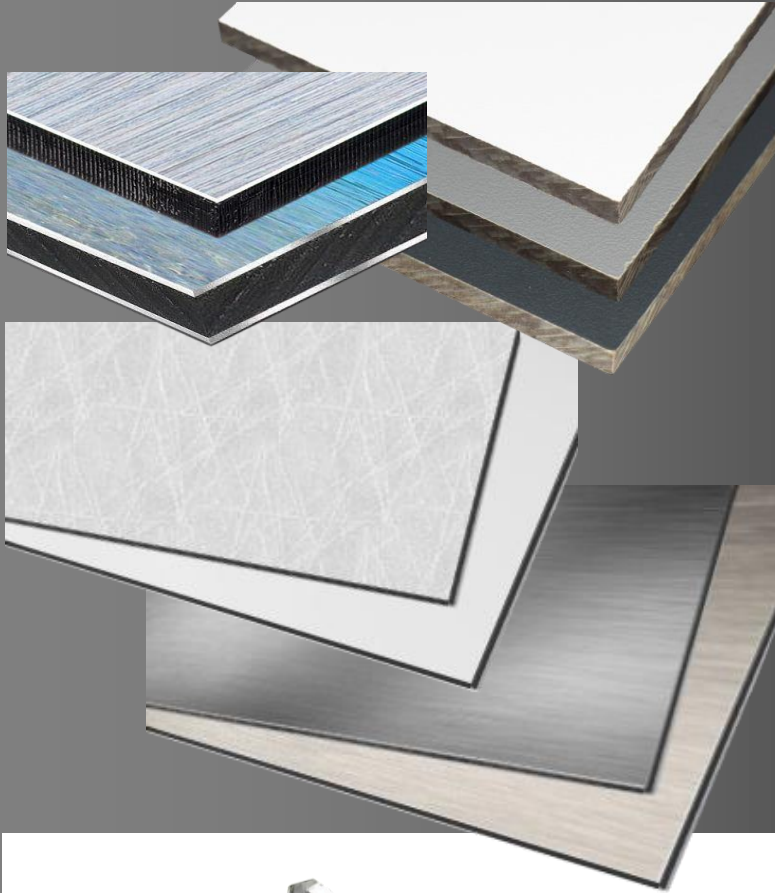

Ø 6, cutting - Ø: 2 ..4 mm

Ø 6, cutting - Ø: 5 ... 6mm, balanced

# **multi-purpose** single and double tooth bits with **High-Tech coating** for use in hard to very hard materials

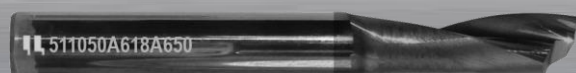

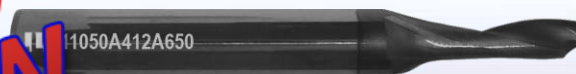

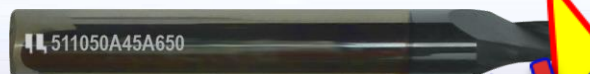

- High-tech coating
- Ultra-hard surface hardness
- extra long-term wear resistance
- Long service life
- Cut and helix angle
- optimally designed for harder materials
- Suitable for:
- **Aluminium, Dibond, HPL, Steel sheets, Steel composite panels, KÖmasteel**

## multi-purpose bits - 1 tooth

511050AxxA650

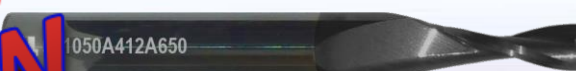

**New**

Ø 6 single-tooth, cutting - Ø: 2 ..6 mm

## multi-purpose bits - 2 tooth

521050AxxA650

**New**

Ø 6 two-tooth, cutting - Ø: 2 ..6 mm

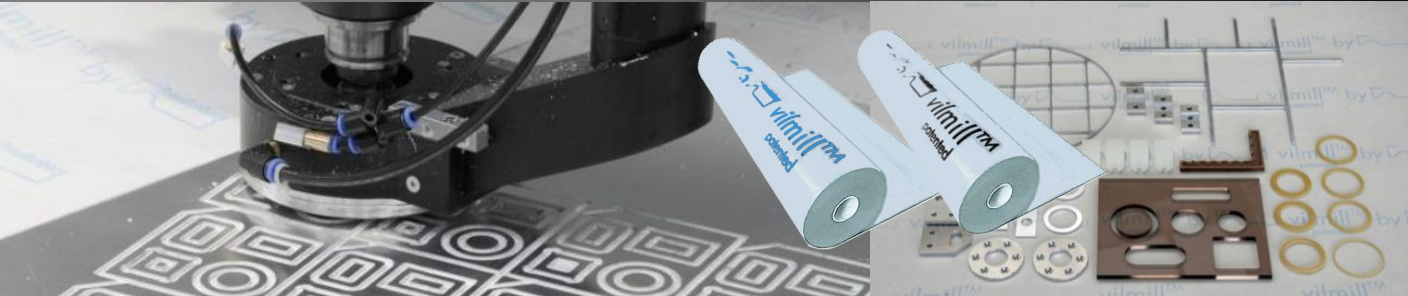

# Underlay - classic

- Holding by machine vacuum
- Solid material structure for neat contours
- Various levels of hardness
- Customized formats as well as rolls up to 1,5 m width

## Sticking effect – **vilmill™**

- Secure holding of smallest parts
- „tensioning mechanism“
- Special adhesive layers
- Up to 2,05 m roll widths

**Do not hesitate to contact us to benefit from our long term experiences!**

**Available for various milling machines and cutting plotters with milling option**

We kindly invite to visit our on-line shop.  
Here you will find appropriate tools.

**Tool solutions according to customer requirements!**
